WATERMELON

-Regular: Crimson Sweet, Sugar Baby, Royal Sweet, Orange Golden, Star Brite

-Triploid or seedless (transplants only): Jack of Hearts, Supersweet 5032, Tiffany

This list was developed to inform the gardener of some of the better varieties of vegetables in this area. These varieties

were selected for their productivity, their resistance to common diseases and for their adaptability to Tarrant County. Using recommended varieties will not necessarily produce the desired results. Proper watering, fertilization, weed control, etc., are also important aspects of successful gardening. Varieties are listed at random and not in order of preference.
